The extensive brewery of Fritz and Wainwright, in the southern part of the city, took fere shout II o'clock to-night, and lestill, at 13,30 a.m., burning furionally, with every prospect that it will be totally destroyed. The building is valued at \$30,000 and stock and machinery at \$50,000. There is an insurance of about \$30,00, mainly in home companies, but their names cannot be accertained to night. There are about 1,000 barrels of beer in the vault, underneath the brewery, which, it is thought, will be saved. The origin of the fire is not known.

Cheap Transportation.

Portiand, Nov 25

The speech of F Iward Crane, of Boston, upon the subject of reap transportation was made there to night at city Hall. Many of his facts and suggestions were novel and chuted marked expressions of approval from the large andience assembled, comprised principalty of the principal torchasis and capitalists of Midne. In the course of his while argument. Mr. Crane clearly proved that railrods constructed and operated on his system can transport increasing account of his while argument in the capital proved that railrods constructed and operated on his system east transport increasing the formal provided and transported at one fourth the cost of the present railroad or land system. He demonstrated that, however, startling these propositions may be past experience, which amounts to practual demonstration, proves the correctness of this theory. Another of Mr. Crane's ideas contemplate the ownership by the State of the pracipal lines to be managed by rainent citizens, who from the corporation but have no interest in the capital stock. This proposition was so strongly presented as to claim the greatest interect of all present. The resolutions adopted were exceedingly complimentary. One of them declared the necessity of lumediate construction of the Nia gara Ship Canal by the government. Cheap Transportation.

Chief Justice Chase this moreing decided the frontiad oath should not be administered to the Grand Juryzzen, as it rather bindered than furthered like ends of justice. A new grand jury was then aummoned under this diction and will only take the oath to support the Constitution of the United States.

New York is becoming more and more like the

of New England origin, though doubtless the French capitol. It has been remarked, that the history of the Church and of the Jewish nation first families in Paris die out in five generations, French capitol. It has been remarked, that the bear record of similar occasions of the public owing to the artificial kind of life to which they subject themselves. New Yorkers ought to take warning for they follow the Parlaian mode in other respects than that of dress. Late hours are now all the fashion. "The pleasure of your company is solicited for --- evening" means, you are not expected to present yourself before ten o'clock; and it is not at all unusual to send out invitations to breakfust for one o'clock,

neither the captions critic nor the carious antiquarian can deny. It was not merely by an aver-sion and separation from the ceremonies and ments now given in the city is perfectly aston-ishing. The muses come in for no small share times of the fact two of the Tuilors or the two of public attention and appreciation, for there irst of the Stuarts that the Puritans won their are two French operss, one Italian opera and concerts without number. Theatres there are in ibundance, but it is a sad commenting on the taste of the community that these dramatic entertainments are most successful, in which there la little heard that is ennobling, and much seen that is not of the most reflaing tendency;

Republican Institutions are the legitimate result Blu regard to lectures, New York, I am glad to say, is beginning to take unusual interest. We have a most excellent course of lectures on ectentific subjects advertised for the mixt three months by the most distinguished professors from all parts of the country; also another course, talse-liqueous in its character, and under the management of Stephen H. Tyng, Jr. The young divine himself is to deliver one, entitled "John Bunyan and his Relations to certain live Issues in Church and State." It is not improbable the defendant in the case of "Stubbs Boggs versua Tyng" may take the opportunity of saying something converning his own relacently given him a little trouble in the free exercise of his tale.ts.

A French lady named Madame Olympe A:

donard, a high ygifted and accomplished person, is now giving a series of lectures in French on dacided faient, and is an uncompromising Republican in her opinions. Her lettines on "Conferences," as shartyles them, are very sprey, full of sharp bits, and nover uninteresting. She has also been quite a traveler, and since her ordival in this country has visued halt Lake Gity and its currous inhibitants. Due of her conference will be on "Turkey," with a coint uison be tween Polygamy in that country and in the Fig. West. In her last feeture, which was styled "Histoire de la Counedle et de la Tragedle," she told her indience that ever in his very excent was the greatest come tion. Very likely the painkiller would agree with her in the wisdom of that atterance. This is an individual that Horace would have honored with a conspicuous place the faculties implanted in man's mame, such a in his Ambubaiarum Collegia, Pharmacopola-Mendici, etc. He has opened an establishment, or rather a hall, in Broadway, where he dispenses his medicinal merchandiac in large and emild quantities. I have had occasion to pass by this place two or three times. My atention was at first attracted by seeing crowds of respectable men flocking in to this wonderful Hal'. On approaching nearer I heard music, voat and instrumental. I entered with the rest, l'lucarda were hung all around telling of the manumbing powers of this new panaces for all the p ins to which poor humonity is heir. Towards the end of the room were scaled three men One was playing a large melodeon, another a fluid and the third was singing a plaintive sort of s dicty. The man at the melodeon jerned in the chorus as did also the other instruments list. this was the sorriest music I had ever heard. If the medicine equalled the music sad killed pain

New York is an expensive place, and tempts. tions to fraud and peculation are not merely con fined to whisky rings and Wall street speculators, hat to many in humble positions. For example, I was going over to the cast side - ! the city t few days ago in the horse-cars. I go into conrerestion with the conductor, a young man of easing appearance and rather latelligent. After asking him various questions regarding his hours per day be had to work. He replied boure." And "what pay do you get for that ?" I returned. "We are allowed only two dollars a day. The drivers have the same, but no chance to make anything. I give my driver one dollar every day. My expenses are two dollars dotlars, you can imagine the rest." Such was the confession of a young conductor, and if true, shows how Jamentably far this system of chesting is carried, and how much the religion com-

panies are to blame for permitting anch a state of things to happen. The excitement in Wall street, brought on by the operations of Daniel Drew, has at length beco sibyed, and business in that hazardous department of trade now flows on as tranquilly as can be expected. The will Daniel was decidedly outwitted by one more cunning than himself in the steck-jobbing profession, and the consequence was the uprove which hightened so many

paopie a few warks ago. Draw and Vanderbilt are the two leading stars n the constellations Ursa Major and Taurus of Wall street. They are both sharp operators and state tillakers in the metaphysics of stocks Daniel, however, is more tippular in the common
